- Wrap up – Celebrate the end of the cohort.

## Opportunities

- Meet the buyer.
- Demo Days and **more**.

NatWest

# NatWest Clean Transport Accelerator

TOMORROW BEGINS TODAY

# Key Points

As the UK's number 1 bank for business, at NatWest we're committed to breaking down barriers to enterprise and supporting ambitious businesses to grow, which is why we have set up the Clean Transport Accelerator in Warwick, which supports entrepreneurs in the transport sector to fast-track their innovations and grow their businesses.

This accelerator is a unique collaboration between NatWest and Warwick Manufacturing Group which supports entrepreneurs building products and services focused on decarbonisation.

# Key Points

Transport is the largest carbon emitting sector in the UK, accounting for more than a quarter of emissions. At NatWest we are committed to ensuring that the UK benefits from the drive to net zero, both economically and environmentally.

Businesses on the Clean Transport Accelerator are diverse, spanning the entire breadth of the mobility sector – We've had businesses who've worked on aircraft batteries and fuel-efficient engines, to e-scooters and cargo bikes.

# Key Points

The NatWest Accelerator Hubs are the centre of innovation and enterprise in their regions – Providing a fully funded 6-month programme to support entrepreneurs, including 1–1 coaching, access to like-minded peers, and focused support from experts.

---

Businesses must be operational within the SME space, looking to pivot and capitalise on the opportunities associated with the emerging clean transport supply chain. They must also be willing to travel to the University of Warwick when required.

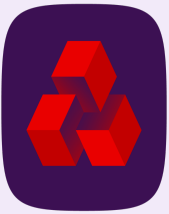

---

Applications for the accelerator programme are open until 16th August 2024.

# The Accelerator
